

# PRICE LIST 2024

EFFECTIVE 1 JANUARY 2024

## BENDANA

**Bendana** is an elastic protection designed to completely cover post-operative dressings, protecting the operated area while allowing the animal absolute freedom of movement.

It is equipped with ties to adjust tightness and length to fit animals of any size and shape.

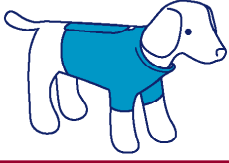

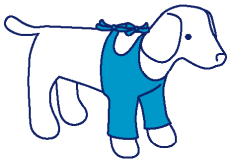

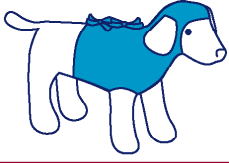

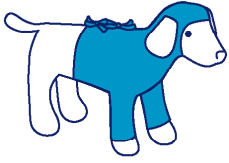

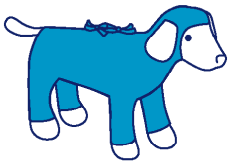

It's simple to use and is easy to remove including during examinations. It ties in the back with a knot and an eyelet or with a double knot. Due to the elasticity of the tissue, knots can be untied easily. If necessary, excess tie length can be cut.

It's made of natural jersey (over 90% cotton and 5 to 10% elastane) so it's soft, breathable and stretchy.

**Bendana** is available in a variety of models depending on the part of the body to be protected. It drastically reduces the time required to bandage the animal, and avoids the use of plasters and cones. Visit our website for more information and to discover other products.
