how to use **BENDANA**

ABDOMEN, CHEST AND HIND LEGS

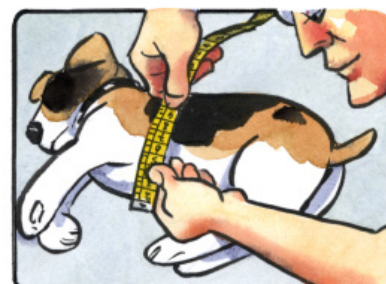

PATENTED

While the animal is still sedated, with a soft meter measure the circumference of the chest

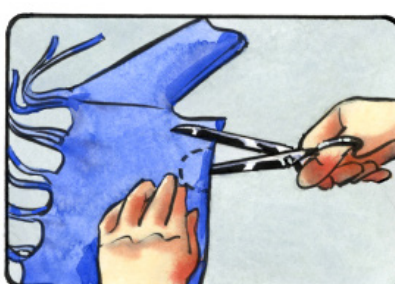

From the taken measurement subtract about 20% and based on the obtained value choose the appropriate BENDANA size

Measure the width of the chest (distance between the two legs)

Fold BENDANA in two and mark 1/2 of the measurement; then, if necessary, widen the pre-arranged half-moon holes

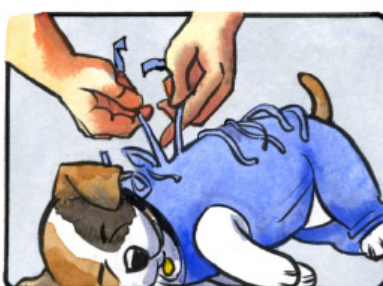

Always with folded protection, if needed, create a hole for male genitals

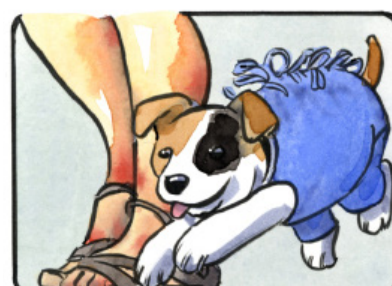

Gently insert the hind legs

Insert the front legs into the created openings

Lace BENDANA up on the back

Upon awakening, the animal will be perfectly at ease and protected thanks to BENDANA!

- Removal of cutaneous masses and nodules
- Abdominal surgery (e.g. enterotomy, splenectomy...)
- Thoracic surgery (e.g. lobectomy, pericardiotomy...)
- Hip/knee/pelvis surgery (e.g. dysplasias, dislocations, traumas...)
- Orchiectomy/male sterilization
- Ovarian-hysterectomy - ovariectomy - female sterilization - mastectomy

- Widespread lesions of various origins

MADE IN ITALY

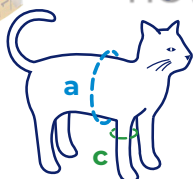

BENDANA

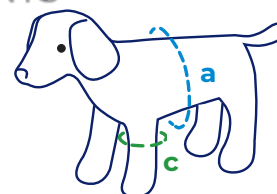

It is a post-operative protection for veterinary use, designed to completely cover the dressings in a safe and lasting way, leaving the animal absolute freedom of movement and eliminating any annoyance caused by the use of plasters, velcro and so on. It is a very simple to use elastic bandage, adaptable in a few steps to any breed and size, easy to remove even for routine checks during convalescence. It is made of natural jersey fabric ($\geq 90\%$ cotton e $5\div 10\%$ elastane). Produced in various models, in different shapes and sizes depending on the part of the body to be protected, it is supplied in two solutions: as shaped articles ready for use and, for the most experts, as a continuous straight protection, to be cut as required.

PATENTED PRODUCT

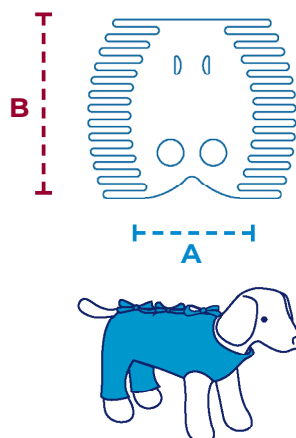

HOW TO TAKE THE MEASUREMENTS

- a** chest circumference
-20% approximately= **A**
- c** circonferenza omero = **C**

HOW TO CHOOSE THE SIZES (MOD. 021)
