

## Veterinary post-operative protection for pets

**Bendana** is an elastic protection that completely covers animal wound and post-surgery dressings. The protection gives the pet a tidy and pleasant appearance that reassures the customer and satisfies the veterinarian. It guarantees hygiene in the home and in the kennel. Bendana is safe and durable, reduces the risk of infection and protects against dirt, licking and tearing of bandages and plasters. The elastic fabric ( $\geq 90\%$  cotton - 5÷10% elastane) allows the animal absolute freedom of movement. It's easy to use and to fit any size pet, minimizing the use of gauze and plasters. It protects the surgical area and is a significant indicator of convalescence that leads to greater respect for the animal. It reduces bandaging time and is economical.
