

BENDANA

Big results at a small cost

Bendana is an elastic protection that completely covers animal wound and post-surgery dressings. The protection gives the pet a tidy and pleasant appearance that reassures the customer and satisfies the veterinarian.

Bendana is safe and durable, reduces the risk of infection and protects the area from dirt, licking and tearing of bandages and plasters. The elastic fabric ($\geq 90\%$ cotton - 5-10% elastane) allows the animal absolute freedom of movement. It's easy to use and to fit to any size pet, minimizing the use of gauze and plasters. It reduces bandaging time and is economical. Bendana post-operative protection guarantees hygiene in the home and in the kennel.
